STORAGE AND USE INSTRUCTIONS:

PreBiotic 30-0-0 is a foliar applied fertilizer that can be used on row crops, turf, vegetables, and fruit applications. It is a saturated polymer solution. It can be blended with most phosphorous potassium and sulfur sources, but only to their solubility thresholds. If this product is being used as a portion of the nitrogen in an NPK blend, it is compatible with most nitrogen sources; it can be mixed with most common pesticides, herbicides, and fungicides. Check compatibility with a jar test before using. This fertilizer should not be mixed with strong acids as product degradation will occur and the fertilizer will precipitate. Use every 8-12 weeks during the growing season.

Do not store below 32°F (0°C). Do not store in direct sunlight. Keep in a cool location out of reach of children and animals. Dispose of empty containers by triple rinsing and discard empty containers in a landfill in accordance with current local, state and federal regulations.

MIXING INSTRUCTIONS:

- Fill mix tank with half of the required spray water and begin agitation.
- Add additional inputs in the following order:
 1. Water dispersible granule, Wettable powders, Dry flowable, Water soluble packets, Flowables, Emulsified concentrate, Solutions, Bio 800+ and 30-0-0, Suspension concentrate, Spray adjuvants
*Agitate fully in between products.
 2. Add remaining water.

APPLICATION RATES:

Rate below show per 1,000 sq. ft.
05 oz - 1/8 lb N
10 oz - 1/4 lb N
14 oz - 1/3 lb N
20 oz - 1/2 lb N
30 oz - 3/4 lb N
